PROFESSIONAL SUMMARY

Final-year Computer Science student with experience across software development, networking, and application security. Skilled in programming, system design, and collaborative project delivery, looking to apply technical skills and grow within a reputed multinational environment.

PROFESSIONAL EXPERIENCES

SRM Institute of Science and Technology - Network Security Engineer Jun 2026 - Jul 2026
Chennai

- Audited router configurations for firmware vulnerabilities and insecure defaults.
- Identified and documented exploitable misconfigurations in vulnerability reports.

BCBUZZ Technologies - Security Mentorship Mar 2025 - Present
Coimbatore

- Received structured mentorship in offensive security across web, API, and network attack surfaces.
- Applied mentorship guidance to live bug bounty research and disclosures.

Human Initials - Cybersecurity Analyst Aug 2025 - Sep 2025
Remote

- Conducted vulnerability assessments and triaged findings across client systems.
- Documented issues and remediation steps in formal assessment reports.

Cybercrime and Forensics Department - Tamil Nadu Police May 2025 - Jun 2025
Coimbatore

- Analyzed digital evidence from cyber incidents, supporting investigations and legal proceedings.
- Implemented secure data handling across cases, ensuring evidence integrity.

Hacktify Cyber Security - Security Engineering Internship Jan 2025 - Mar 2025
Remote

- Assessed web app architectures for vulnerabilities across auth and API boundaries.
- Delivered remediation roadmaps from offensive security findings to dev teams.

TECHNICAL SKILLS

- **Languages & Scripting:** Python, PowerShell, SQL, JavaScript, TypeScript, HTML, CSS — automation, secure coding, API integration.
- **Reverse Engineering & Cryptography:** Malware analysis, exploit research, IDA Pro, AES, RSA, SHA, key management, threat modeling, IDS/IPS.
- **Full-Stack Development:** React, Node.js, Express, Flask, MySQL, MongoDB, Docker, Git — secure end-to-end applications.
- **Bug Bounty & Offensive Security:** Web exploitation, IDOR, SQLi, JWT forgery, WAF bypass — HackerOne, Bugcrowd, Intigriti, CERT-In.

EDUCATION

Sri Krishna College of Technology - Coimbatore 2023 - 2027

- Computer Science Engineering - Specialization in Cyber Security - CGPA : 7.5

Hilton Matric Higher Secondary School - Tenkasi

- Tamil Nadu State Board – Higher Secondary Certificate (HSC)

CERTIFICATIONS & COURSES

- OPSWAT Cybersecurity Fundamentals Associate (OCFA) - **OPSWAT Academy**
- OPSWAT Legacy Systems Security Associate (OLSA) - **OPSWAT Academy**
- Penetration Testing, Threat Hunting & Cryptography - **IBM, Coursera**
- Cybersecurity Foundations - **Google, Coursera**
- Introduction to DevOps (97%) - **IBM, Coursera**
- Hacking WEP/WPA/WPA2 Wi-Fi Networks - **Packt, Coursera**

PROJECTS

- **Network Intrusion Detection System (NIDS)** - Multi-engine network intrusion detection system achieving 94.1% F1-score at 18,828 packets/sec.
- **Temporal Authentication System (TAS)** - Keystroke-dynamics based behavioral biometric identity verification system for continuous user authentication.
- **Maliketh** - Local-first password vault with XChaCha20-Poly1305 encryption and Argon2id key derivation; zero cloud dependency, zero third-party attack surface.
- **Zero Trust IoT Pipeline (ZTIP)** - ESP32-to-cloud security pipeline implementing mTLS, real-time anomaly detection, and blockchain-backed immutable audit logging.
- **Web Prowler** - Automated recon and vulnerability scanner using Tor framework and Nmap-based exploit detection; 1st place, Science Expo 2024.
- **NFC Conditioned PUF Authentication System (NFC-PUF)** - NFC-triggered physically unclonable function based hardware-level device authentication on ESP32.
- **ROOK** - Multi-process voice-controlled AI assistant built on Deepgram, Groq, LiveKit, and FastMCP with real-time tool execution; zero infrastructure cost.
- **Dossier** - Open-source OSINT engine aggregating data across 250+ sources with identity correlation, exposure scoring, and FastAPI async backend.

ACHIEVEMENTS

- **1st Place, CyberClash Hackathon 2026** - PESU University (₹12,000 cash prize), led offensive security operations for team Dead Cell
- **Ranked [0xE] Guardian on TryHackMe** - top 1% globally (#8,474 worldwide), 378-day streak across 219 rooms spanning web exploitation, privilege escalation, and network pivoting.
- **Discovered a critical time-based blind SQLi vulnerability in TNSTC's booking platform** - exposing 5M+ passenger records via unsanitized POST parameters; responsibly disclosed, acknowledged, and patched.
- **Amazon checkout logic bypass** - intercepted payment responses allowed full order confirmation and invoice generation without actual payment; disclosed responsibly.
- **1st Place, Science Expo 2024** - built Web Prowler, an automated recon and vulnerability scanner using Tor framework and Nmap-based exploit detection.
- **CVE research (ongoing)** - firmware vulnerabilities and insecure defaults in consumer routers, in collaboration with Prof. John D Prasanna, SRM University.
- **Conducted cybersecurity awareness sessions** : Covering Nmap-based network reconnaissance and web vulnerability fundamentals for peers.
- **Linux & OS Mastery** - Operated 20+ distributions and Android custom ROMs over 4 years including Arch, Kali, Parrot, and BlackArch; comfortable at kernel and system administration level.

LANGUAGES

- **Languages:** English, Tamil — Proficient · Hindi — Intermediate
