

P. S. PADMESH

PENETRATION TESTER | BUG BOUNTY HUNTER | SECURITY RESEARCHER

✉ padmesh77123@gmail.com ☎ +91 7010612013 💡 padmesh6119 🌐 linkedin.com/in/padmash6119

SUMMARY

Final-year Computer Science student with experience across software development, networking, and application security. Skilled in programming, system design, and collaborative project delivery, looking to apply technical skills and grow within a reputed multinational environment.

TECHNICAL SKILLS

Languages & Scripting: Python, PowerShell, SQL, JavaScript, TypeScript, HTML, CSS — automation, secure coding, API integration.

Bug Bounty & Offensive Security: Critical findings in payments, APIs, auth bypass, IDOR — Medium writeups, CERT-In escalations, HackerOne/Bugcrowd/Intigriti.

Reverse Engineering & Cryptography: Malware analysis, exploit research, IDA Pro, AES, RSA, SHA, key management, threat modeling, IDS/IPS.

Full-Stack Development: React, Node.js, Express, Flask, MySQL, MongoDB, Docker, Git — secure end-to-end applications.

PROFESSIONAL EXPERIENCE

SRM Institute of Science and Technology - Network Security Internship

Jun 2026 - Jul 2026

- Audited router configurations for firmware vulnerabilities and insecure defaults.
- Identified and documented exploitable misconfigurations in vulnerability reports.

BCBUZZ Technologies - Security Mentorship

Mar 2025 - Present

- Received structured mentorship in offensive security across web, API, and network attack surfaces.
- Applied mentorship guidance to live bug bounty research and disclosures.

Human Initials - Cybersecurity Analyst

Aug 2025 - Sep 2025

- Conducted vulnerability assessments and triaged findings across client systems.
- Documented issues and remediation steps in formal assessment reports.

Cybercrime and Forensics Department - Tamil Nadu Police

May 2025 - Jun 2025

- Analyzed digital evidence from cyber incidents, supporting investigations and legal proceedings.
- Implemented secure data handling across cases, ensuring evidence integrity.

Ranked top 1% globally on TryHackMe

PROJECTS

Temporal Authentication System – Keystroke-dynamics based identity verification system

Web Prowler – Automated recon and vulnerability scanner. 1st Place – College Tech Fest.

NFC Conditioned PUF Authentication System – NFC-triggered PUF-based device authentication.

Maliketh – Local-first password vault with XChaCha20-Poly1305 encryption and Argon2id key derivation.

Zero Trust IoT Pipeline – ESP32-to-cloud security pipeline with mTLS, anomaly detection, and blockchain-backed logging.

NIDS – Multi-engine network intrusion detection system; 94.1% F1-score at 18,828 packets/sec.

EDUCATION

Sri Krishna College of Technology - Coimbatore

2023 - 2027

- Computer Science Engineering — Cybersecurity Specialization

Hilton Matric Hr. Sec. School - Tenkasi

2020 - 2022

- Tamil Nadu State Board – Higher Secondary Certificate (HSC)
