SUMMARY

Cybersecurity professional and ethical hacker focused on delivering robust security outcomes and addressing complex threats. Experienced in collaborating across teams to embed security by design and strengthen overall defense posture. Eager to apply skills to drive proactive security measures in dynamic environments.

TECHNICAL SKILLS

Languages & Scripting : Python, PowerShell, SQL, JavaScript, TypeScript, HTML, CSS — skilled in automation, secure coding, and API integration.

Networking & Platforms : TCP/IP, DNS, VPNs, Firewalls, Port Scanning, Packet Analysis, Linux, Windows — experienced in network hardening and system monitoring.

Reverse Engineering & Cryptography: Malware analysis, Exploit research, IDA Pro, AES, RSA, SHA, Secure key management, Threat modeling, IDS and IPS.

Full-Stack Development: React, Node.js, Express, Flask, MySQL, MongoDB, Docker, Git — proficient in building and deploying secure end-to-end applications.

PROFESSIONAL EXPERIENCE

Hacktify Cyber Security - Pentesting Internship

Feb 2025 - Mar 2025

- Monitored and analyzed security events to proactively detect threats.
- Identified and mitigated 10+ critical vulnerabilities, improving system compliance

Human Initials - Cybersecurity Analyst

Aug 2025 - Sep 2025

- Monitored 1,000+ security events to proactively detect threats.
- Conducted vulnerability assessments across 50+ systems, mitigating critical gaps and improving compliance by 30%.

Cybercrime and Forensics department - Tamil Nadu Police department

May 2025 - Jun 2025

- Analyzed digital evidence from 20+ cyber incidents, supporting investigations and ensuring proper evidence handling for legal proceedings.
- Implemented secure data handling across 20+ cases, ensuring evidence integrity.

Ranked top 1% globally on TryHackMe - showcasing advanced hands-on cybersecurity expertise

PROJECTS

Temporal Authentication System © - An innovative authentication mechanism utilizing keystroke timing analysis to enhance identity verification and provide an additional layer of security beyond conventional password systems.

Web Prowler - Automated scanner that enumerates open ports, correlates service/version data with known vulnerabilities, and proactively maps likely attack vectors with risk-prioritized remediation guidance for defensive response and secure hardening that secured the first place in College tech fest .

NFC Conditioned PUF Authentication System – A PUF-based security solution using NFC-triggered authentication to ensure device authenticity and prevent cloning.

EDUCATION

Sri Krishna College of Technology - Coimbatore

2023 - 2027

- Major in Cybersecurity
- Gained solid expertise in both frontend and backend development through academic coursework and hands-on projects.

LANGUAGES

- **Languages**: English, Tamil — Proficient · Hindi, Japanese — Intermediate
